Cheap Labor.

In no Territory of the Union can labor for the ordinary purposes of the farm or ranch be obtained so cheaply as in New Mexico. We have a large class of poor people who are ready and willing to work at very low wages if employment is only furnished them. If all the idle hands in New Mexico were constantly occupied in productive employments what a vast differ ence a few years would make in the wealth of the Territory. This labor should be not only employed but it ought to be properly taught and directed. Constant work for the people would be a supplement to the schools as a means of education, in fact for the next half dozen years it would far surpass them. How to furnish employ ment to a large class of people who do not by Richard Dunn Larry Watters, Mrs. know how to help themselves and to proper- Robt. Wootten and Mrs. L. J. Wesche. ly direct their labor is a problem which should demand the attention of the community. Our own opinion is that nothing will solve this problem so quickly as the construction of a railroad into or though the territory. To vote county or territorial aid to railroads is objected to by many; it is said the heavy taxation is more detri mental to the country than the benifits derived. This may be the case with many new countries, but this territory is an exception. Our condition is anomalous. In other territories everybody works, in this a large proportion of the population are idle. We would urge the building of a railroad, voting bonds or anything else to secure it speedily, not for the railroad itself but as means of education of enlightenment. as an inaugurator of enterprises solely for the purpose of farnishing work to everybody. If all the labor of New Mexico, which otherwise will remain idle, was uffized we could build half a dozen roads

through the territory in the next six years. LOCALS.

Babcock's Case.

Washington, Feb. 3 .- There is unquestionably a very bitter feeling on the part of the President toward Secretary Bristow, but it is not true that an open rupture was caused yesterday by the cavalier manner in which the Secretary is reported to have treated the President. That the President has determined to testify in Bahcock's interest is true, but it is not true that either Secretary Bristow or Attorney General Pierrepont have attempted to persuade him from this course. It is understood here that both McKee and Magnize are to testify for the Government in the Babecck case. and if they tell all they know, the President will not be in a condition to benefit Babcock much by his testimony.

The friends of Babcock have been well nigh horeless since McKee was convicted and Magnire has plended guilty, and the President is in a towering passion with Bristow; but he is like a mad elephant chained by both hind legs. He has confidently expected McKee's acquittal and Babcock's vindication, Then, with his favorite rescued from the clutches of the law, Bristow was to be turned out of the and all points in the States. It is prompt Cabinet unceremoniously; but if Babcock and safe, with sure connections in Union was unprecedently mild until about the 1st | is convicted he dare not do this, and there | Depots at Kansus City and I eavenworth. fore he has to chew the bitter end of his Pullman cars on all trains to and from Kit wrath without a distant prospect of gratify- | Carson. The work originally sublicted under the title of

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political absirs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peutlar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily term ended and a new course of commercial and industria activity has been commenced. Large accessions to our

GEOGRAPHICAL KNOWLEDGE

Have been made by the indefatigable explorers of Africa. The great political revolutions of the last decade, with the natural result of the last of time, have wought into public view a multititle, have wought into putter few man, tale of new men, whose names are in every one's mouth, and of whose life every one is curious to know the particulars. Great hatfles have teen sught and important sieges resiniained, of which the details are as yet preserved only in the Tewspapers, or in the transient publications of the day, but which ought now to take their place in Permanent and authentic History. In preparing the present cilition for the prese,

It has accordingly been the sim of the editors is bring down the information to the latest possible dates, and to farmish an accurate second of the most recent discoveries in science, of every firsh production in literature, and the newsat invar-tions in the trustical arts, as well as to give a succinct and original record of the progress of Political and Historical Events. The work has been begun after long and careful

preliminary later, and with the nest raple re-searce for carrying if on to a secret differential-tion. None of the original stereotype plates have been used, but every page has seen PRINTED ON NEW TYPE, Forming in fact a new Cyclopadle, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditors, and with such improvements in its composition as have been supersied by longer experience and enlarged knowledge.

THE ILLUSTRATIONS Which are introduced for the first time in the prasent edition have been added not for the sake of
victorial display, but to give arrater includity and
farm to the explanations in the text. They emtense all branches of science and of natural liktary, and depict the most famous and refrantable features of science, and are
as well as the various processes of mechanics and
manufactures. Although intended for instrution rather than embellishment, no pains have
been approach to insure their

ARTISTIC EXCELLENCE. The cost of their execution is enormous, and it to helleved they will find a welcome reception as an solution ble feature of the Cyclopædia, and worthy This work is sold to subscribers only, payable on delivery of each volume. It will be complete in Sixters Laren Octavo Volumes, enchousing about 600 pages, fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.
